

The background of the entire page is a grayscale photograph of industrial control valves. In the foreground, a large, complex valve assembly is visible, featuring a black body, a white actuator with two pressure gauges, and various flanges and bolts. Other valves are visible in the background, creating a sense of a complete product line.

Features

High Performance Design

Masoneilan's 41005 Series heavy-duty globe control valves are engineered to handle the most demanding process conditions and exceeds the capabilities of comparable designs. The balanced cage-guided construction of the 41005 Series provides some key advantages versus typical unbalanced and/or contoured plug type designs:

- Higher Flow Capacities
- Higher Pressure Drop Capabilities
- Tighter Shut-Off Ratings
- Reduced Actuator Size and Thrust Requirements
- Improved Stability with Larger Guide Areas
- Increased Low Noise and Anti-Cavitation Trim Options

Wide Application Range

Masoneilan's 41005 Series control valves provide high flow capacities combined with low pressure recoveries as reflected by the high F_L factors. This product line also provides efficient and dependable performance over a wide range of pressures and temperatures typical in critical service applications.

Maximum Reliability

Specification and selection of the best solution for any application is simplified with the standard design options and materials available in the 41005 Series. Standard product construction and material combinations are based on over 30 years of successful field experience in various process industries.

Various Seal Options

The 41005 Series is available with a variety of seal designs and materials to meet a wide combination of temperature and shut-off requirements.

Versatile Trim Solutions

Various noise attenuation, anti-cavitation, and tight shut-off solutions are available within the standard 41005 product envelope. This includes the following trim options:

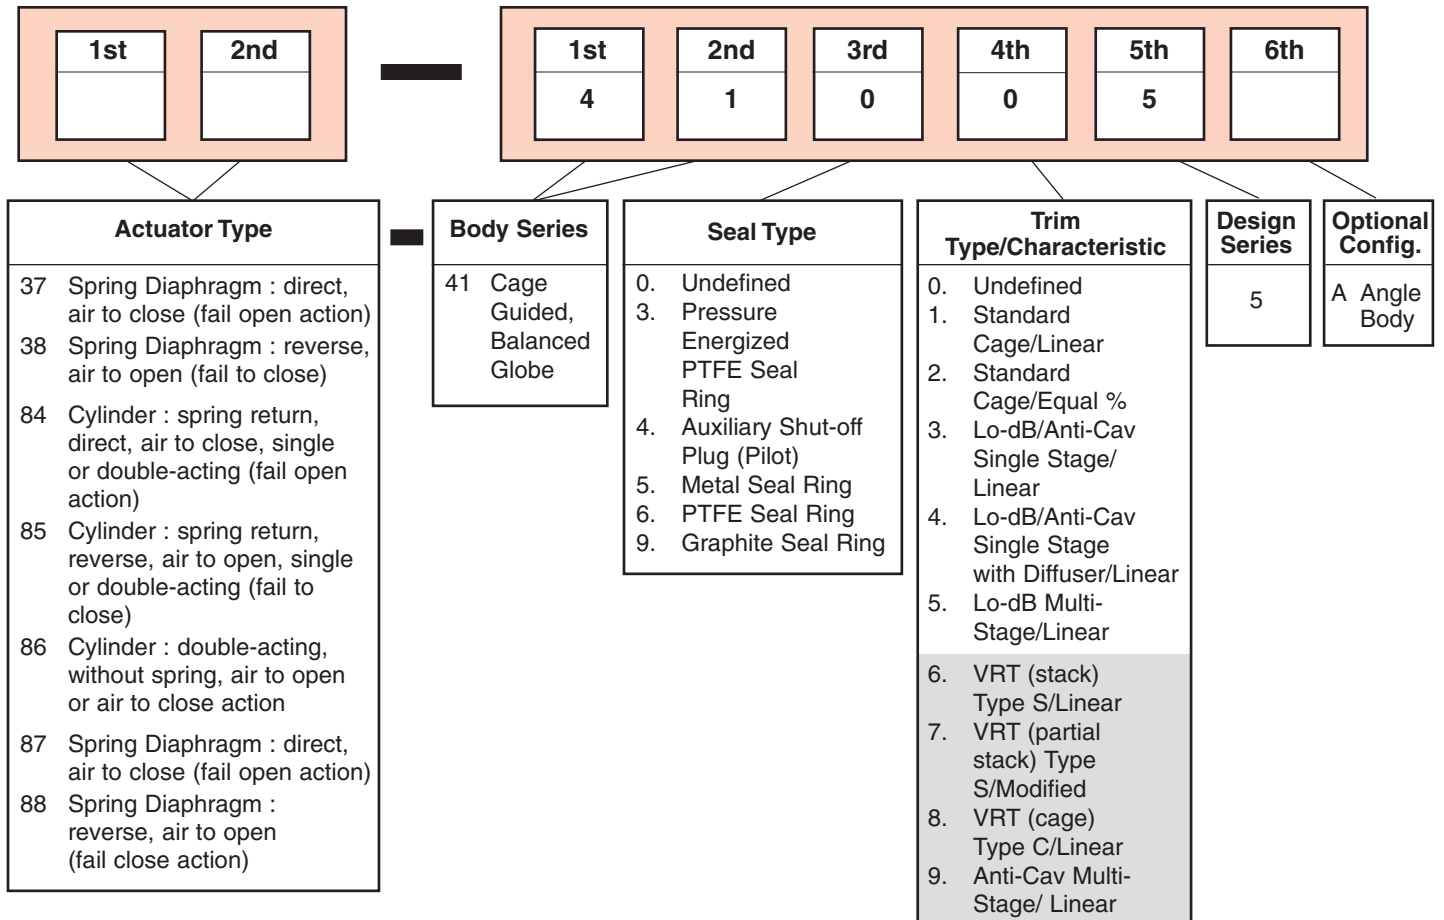

- **Single Stage Trim** – Provides excellent low noise performance on either gas or steam applications. Also provides an effective anti-cavitation solution for liquid services.
- **Multi-Stage Trim** – Provides highly effective low noise and anti-cavitation solutions for high-pressure ratio applications.
- **Pilot Balanced Trim** – Provides unmatched tight shut-off performance for high temperature applications.
- **Internal Diffuser** – Provides additional low noise and anti-cavitation benefits in flow-to-close (FTC) applications.
- **Engineered Solutions** – Special trim designs can also be provided for applications not covered by the standard trim noted above.

NACE Compliance

The 41005 Series is available for sour service applications using design and construction methods in accordance with NACE Standard MR0175.

Numbering System

General Data

Standard Valve (41305, 41405, 41505, 41605 and 41905)

• Body

type : high-capacity globe or angle
 flow direction : see Flow Direction Table
 Lo-dB trim : flow to open for gas or steam
 Lo-dB trim
 with diffuser : flow to close for gas or steam
 anti-cavitation trim : flow to close
 C_v ratio : 100:1 standard capacity trim
 50:1 Lo-dB and reduced capacity trim

• Bonnet

type : stud bolted extension

• Trim

cage : cylindrical ported or Lo-dB
 plug : pressure balanced cage guided with various seal ring options; pressure balanced cage guided, with spring loaded internal auxiliary tight shut-off plug

• Standard Flow Characteristics

standard trim : linear, equal percentage
 Lo-dB trim : linear
 Lo-dB trim
 with diffuser : linear
 anti-cavitation trim : linear

Lo-dB® Multi-Stage Valve (41355, 41555, 41655, 41955)

flow direction : flow to open
 gas or steam only
 C_v ratio : 50:1

• Trim

cage : multi-stage Lo-dB
 plug : pressure balanced cage guided with various seal ring options

• Standard Flow Characteristic

standard trim : linear

Actuator

type : spring diaphragm
 spring-return cylinder
 double-acting cylinder

handwheel : optional

Notes: 1. PTFE/Carbon and graphite wipers rings required for ANSI Class 1500 and 2500.

2. Conical spring only required for valve sizes 6" to 16" for applications > 450°F (232°C).

3. Cage gasket only required for valve sizes 6" to 16" for applications ≤ 450°F (232°C).

4. Internal Diffuser includes an internal 316SS Seat Ring with hardfaced seat. This part replaces the Seat Ring (Ref. No. 13) when this option is selected. See graphic on page 15.
