

EXTERNAL CAGE

Liquid Displacer Level Switches

DESCRIPTION

External cage type level switches are completely self-contained units designed for side mounting to a tank or vessel with threaded or flanged pipe connections. These switches are engineered to customer specifications.

FEATURES

- · Carbon or stainless steel welded float cages (other materials available at request)
- Process temperature up to 260 °C (500 °F)
- · Single switch level
- Standard anti corrosive protection

Flanged cages:

- Removable sensing unit from cage allows easy maintenance
- Specific gravity as low as 0,40
- Process pressure up to 345 bar (5000 psi)

Sealed cages:

- Sensing unit and cage are self-containing
- Specific gravity as low as 0,40
- Process pressure up to 345 bar (5000 psi)

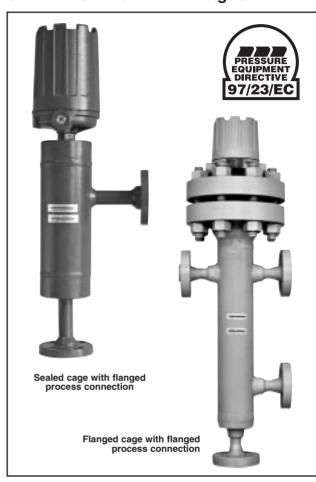

Optional:

- NACE construction (MR-01-75)
- Interface calibration
- Customized installation dimensions
- Special actuating levels
- Code compliance construction
- Special tank connections
- Class 1, Group B explosion proof electrical enclosure
- Special exterior surface preparation and finish

APPLICATIONS

- Foaming or surging liquids
- Agitated fluids
- Sewage handling
- Dirty liquids
- Paints
- Varnishes
- · Heavy oils
- · Liquids with solids

Standard & tailor made designs

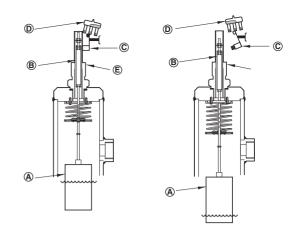

AGENCY APPROVALS

Agency	Approval		
ATEX	II 2G EEx d II C T6, explosion proof II 1G EEx ia II C T6, intrinsically safe		
CENELEC	EEx d II C T6	, explosion proof	
CCE ①	R1 (1) 136/MI	/433, explosion proof	
FM	Class I, Div. 1, Groups C & D Class II, Div. 1, Groups E, F & G, Type NEMA 7/9		
FM/CSA ^②	Non-Hazardous area		
	Explosion proof area – Groups B, C, D, E, F & G Type NEMA 4X/7/9		
SAA ^②	Explosion pro	of area	
LRS	Lloyds Register of Shipment (marine applications)		
GOST/ GOSGORTECHNADZOR ^②		Russian Authorisation Standards	
Other approva	ls are available,	consult factory for more details	

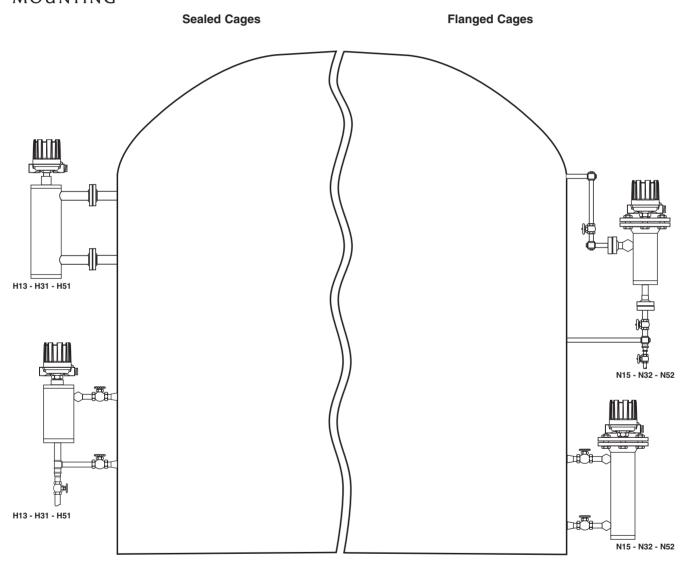

- ① For CCE approved units, use the ATEX explosion proof model numbers.
 ② Consult factory for proper model numbers.

PRINCIPLE OF OPERATION

The displacer (a), which is heavier than the liquid, rests its weight on a spring. Rising liquid level imparts buoyancy to the displacer allowing the spring to move upward. The attraction sleeve (b), attached to the spring, moves upward into the field of a permanent magnet (c). Magnet motion tilts the switch (d) for actuation. A non-magnetic barrier tube (e) provides a static seal between the switch mechanism and the displacer assembly.

MOUNTING

EXPEDITE SHIP PLAN (ESP)

Several mechanical switches are available for quick shipment, within max. 3 weeks after factory receipt of purchase order, through the Expedite Ship Plan (ESP).

Models covered by ESP service are conveniently grey coded in the selection data charts.

To take advantage of ESP, simply match the grey coded model number codes (standard dimensions apply).

ESP service may not apply to orders of ten units or more. Contact your local representative for lead times on larger volume orders, as well as other products and options.

AVAILABLE SWITCH MECHANISMS

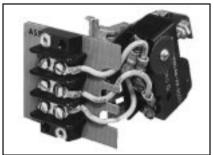

Type of switch module ^①	Max. Process Temp. ^②	Switch	Code		
Type of switch module	wax. Process remp.		240 V AC	120 V AC	Code
Micro switch	max 120 °C (250 °F)	6	15	15	В
Micro switch	max 230 °C (450 °F)	10	15	15	С
Micro switch - DC current	max 120 °C (250 °F)	10	_	10	D
Micro switch with gold alloy contacts	max 120 °C (250 °F)	1	_	1	U

Hermetically sealed micro switch with gold plated contacts	max 230 °C (450 °F)	0,5	0,5	0,5	Х
Proximity switch - type SJ 3.5 SN	max 100 °C (210 °F)	NA	NA	NA	V
Mercury switch	max 260 °C (500 °F)	10	6,5	13	А
Pneumatic bleed type (open air)	max 200 °C (400 °F)	NA	NA	NA	J
Pneumatic non bleed type (closed circuit)	max 200 °C (400 °F)	NA	NA	NA	K

- For applications with heavy vibration, consult factory for suited switch modules.

 Max process temperature is specified at 40 °C (100 °F) ambient temperature and for non condensing applications.

 For more details see bulletin BE 42-120.

 For condensing applications, max process temperature is down-rated to 200 °C (400 °F) @ 40 °C (100 °F) ambient.

A complete measuring system consists of:

- 1. Order code for caged models (each unit can be factory calibrated when specific level differentials are specified separately).
- 2. Order code for **modified** models or adders: put an "X" in front of the closest matching order code and specify the modifications/adders separately

eg. XN15-AB20-AAQ

X = with material certification EN 10204 / DIN 50049-3.1.B
